QUALITY CLOUD SERVICE AUTOMATION

How can QUALES-CUBIX help me through my workflow?

It does not mind if your workflow is deployed *on premise* or in the cloud, QC elements are supporting all the steps into CUBIX workflows, easy to run at any automation layer.

Why should I choose SaaS?

Because sometimes a Capex license is not the best solution, QUALES-CUBIX is providing a SaaS license, cost effective solution adapted to any type of operation. SaaS and Transactional operations are suitable for smaller companies as well as for a most of the scalable systems in the market.
